Dear John,

I've heard third-hand that you've discovered a ~~forged~~^f Oswald handbill. That is interesting.

Years ago Paul Hoch made a study of that business.

The history of the actual one is not quite what the government said and most critics believe, if that is of any interest to you.

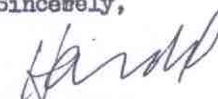

For one thing it was not Oswald who picked that job up.

For another, as soon as the FBI learned that the Secret Service was making an investigation of it, it had the Secret Service called off.

And then did nothing itself except blur it over.

Hope your book is coming along.

Sincerely,

Harold Weisberg
